

# Mapping from the PROJEXDATA EVENTS fields to the new Harmonized Data Model

<b>Version</b>	<b>Date</b>	<b>Author</b>	<b>Modifications description</b>
<b>1.0</b>	2020-11-24	IT/EMA	Initial version
<b>1.1</b>	2021-11-26	IT/EMA	Sub-sector and publicationStage added to Projects and Publications HAPIs.

2020-11-24

This document intents to map the elements available in the CEN and CENELEC PROJEXDATA EVENTS to the new Harmonized data model.

Element Name	Field description	Availability in new Harmonized Data Model	Comment
<b>EVENTID</b>	Unique identifier of the Event	Not available	
<b>WIID</b>	Unique identifier of the WI.	project/urn  e.g. cen:proj:8314 cenelec:proj:60348	
<b>WIN</b>	Work item number	project/urnAlt  e.g. cen:winumber:00185092 cenelec:winumber:60348	
<b>WIS</b>	Activity status of a work item	Not available	Please check the current stage of the WI to determine its status.
<b>TRACK</b>	The track identifies the strategy 'of development' (i.e. the production line) which has been chosen to produce a standard	project/processInfo/track	
<b>RESPN</b>	Name of the Technical Body responsible for the project.	project/owner/ displayName	
<b>RESPID</b>	Responsible Technical Body ID	project/owner/urn	
<b>DRAFTN</b>	Name of the Drafting body responsible for the project.	project/developer/displayName	
<b>DRAFTID</b>	Drafting Body ID	project/developer/urn	
<b>STS</b>	The Standard status that identifies the possible values of validity status of a standard.	publication/status	Cases: <ul style="list-style-type: none"> <li>• when STS = 'Not Published' (1) then 'DRAFT'</li> <li>• when STS = 'Published' (2) then</li> </ul>

2020-11-24

			'PUBLISHED' <ul style="list-style-type: none"> <li>when STS = 'Withdrawn' (3) then 'WITHDRAWN'</li> </ul>
<b>REF</b>	Reference of the document corresponding to the present stage of the work.	project/reference	
<b>ESO</b>	The European Standardization Organization under which the responsible technical body works.	project/originator  e.g. CEN, CENELEC, CEN/CENELEC	
<b>JOINT</b>	Indicates if the project is a joint work item between European ESOs.	NOT AVAILABLE	The WI is a joint project when project/originator = "CEN/CENELEC"
<b>LEAD</b>	The acronym of the organization leading. Only provided for joint work items	NOT AVAILABLE	
<b>DEL</b>	Class of the standard defined by its identification, objective, life cycle, adoption process, implementation obligations involved...	Project/stdType  e.g. EN, TS,...	"CG" value is replaced by "GUIDE"
<b>PARALL</b>	Type of Vienna/Frankfurt Agreement	project/projectRelations/ projectRelations /type = VIENNA_AGREEMENT (for CEN) = FRANKFURT_AGREEMENT (for CLC)  project/projectRelation/lead e.g. ISO_lead or CEN_lead	Frankfurt Agreement is IEC lead by default.
<b>INTREF</b>	Reference of the ISO or IEC document for Work Items under Vienna Agreement or Frankfurt Agreement.	project/projectRelations/ projectRelation [type = 'VIENNA AGREEMENT' or 'FRANKFURT AGREEMENT']/externalProject/ displayName	

2020-11-24

<b>INTDOC</b>	Reference of the working document (available for IEC projects only, prior to publication)	NOT AVAILABLE	Data to be found in the IEC data feed via the project urn available in project/projectRelation/externalProject/projectId
<b>INTID</b>	ISO or IEC record identifier for Work Items under Vienna Agreement or Frankfurt Agreement.	project/projectRelation/externalProject/projectId	This urn can be used to make the link to the project in the ISO or IEC data feed.
<b>INTRESP</b>	ISO or IEC responsible body	NOT AVAILABLE	Data to be found in the IEC data feed via the project urn available in project/projectRelation/externalProject/projectId
<b>BASISORG</b>	Name of the organization developing the non CEN or CENELEC Standard on which the WI is based.	project/projectRelations/ projectRelation [type = 'ADOPTED_FROM']/externalProject/originator	
<b>EQV</b>	Identifies the degree of equivalence between the CEN or CENELEC Standard and the non CEN or CENELEC Standard.	NOT AVAILABLE	
<b>CAT</b>	Category of the standard (Main, Amendment,...).	Project/supplType	Cases: <ul style="list-style-type: none"> <li>• when CAT = 'Main' (1) then null</li> <li>• when CAT = 'Amendment' (2) then 'AMD'</li> <li>• when CAT = 'Corrigendum' (3) then 'COR'</li> <li>• when CAT = 'Main + Amendment' (4) then 'CONSOLIDATED'</li> <li>• when CAT = 'Main + Corrigendum' (5) then 'CONSOLIDATED'</li> </ul>
<b>CURR</b>	Stage-code of the last realized stage.	project/stages/stage [status = 'CURRENT']/stageCode	
<b>REAL</b>	Current stage realized date	project/stages/stage [status =	

2020-11-24

		'CURRENT']/effectiveDate	
<b>CURRDESC</b>	Description of the current stage-code (milestone)	Not available	
<b>NEXT</b>	Next milestone stage-code	project/stages/stage [status = 'PLANNED']/stageCode	
<b>NEXTDATE</b>	Target date for next stage-code	project/stages/stage [status = 'PLANNED']/targetDate	
<b>ENQ_START</b>	Target date for submission to enquiry (40.20.0000)	project/stages/stage [harmonizedStageCode = '40.20']/targetDate	Use the element 'effectiveDate' to retrieve the realized date for this stage.
<b>ENQ_END</b>	Target date of closure of enquiry (40.60.0000)	project/stages/stage [harmonizedStageCode = '40.60']/targetDate	Use the element 'effectiveDate' to retrieve the realized date for this stage.
<b>TITLE_EN</b>	WI English title	project/title xml:lang="en"	
<b>TITLE_FR</b>	WI French title	project/title xml:lang="fr"	
<b>TITLE_DE</b>	WI German title	project/title xml:lang="de"	
<b>SCOPE_EN</b>	WI English scope	project/abstract xml:lang="en"	
<b>SCOPE_FR</b>	WI French scope	project/abstract xml:lang="fr"	
<b>SCOPE_DE</b>	WI German scope	project/abstract xml:lang="de"	
<b>DOR</b>	Date of Ratification	project/stages/stage [harmonizedStageCode = '60.55']/targetDate	Use the element 'effectiveDate' to retrieve the realized date for this stage.
<b>DAV</b>	Date of Availability	project/stages/stage [harmonizedStageCode =	Use the element 'effectiveDate' to retrieve the realized date for this stage.

2020-11-24

		'60.60']/targetDate OR Publication/dateOfAvailability	
<b>DOA</b>	Date of Announcement	project/stages/stage [harmonizedStageCode = '65.31']/targetDate OR Publication/publicationDate	
<b>DOP</b>	Date of Publication	project/stages/stage [harmonizedStageCode = '65.51']/targetDate OR Publication/dateOfPublication	
<b>DOW</b>	Date of Withdrawal	project/stages/stage [harmonizedStageCode = '65.62']/targetDate OR Publication/dateOfWithdrawal	
<b>SRVTYPE</b>	Type of Standard Released Version	publication/publicationStage	The phase of a document can also be known from the "Project" API via: <i>project/stages/stage/publications</i>  e.g. <i>project/stages/stage [stageCode = 40.20.0000]/publications</i> . → Enquiry document
<b>URL_EN</b>	URL of the (draft) standard (English version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for	publication/releaseItems/releaseItem [contentLanguage = 'en']/ contentRef/url	

2020-11-24

	CENELEC		
<b>URL_FR</b>	URL of the (draft) standard (French version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for CENELEC	publication/releaseltems/releaseltem [contentLanguage = 'fr']/ contentRef/url	
<b>URL_DE</b>	URL of the (draft) standard (German version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for CENELEC	publication/releaseltems/releaseltem [contentLanguage = 'de']/ contentRef/url	
<b>URL_OTHER</b>	File not related to a language version of the draft (e.g. Dispatch Notice when voting on ISO document...). URL of the file available on the e-TRANS Livelink platform (bypass URL).	publication/releaseltems/releaseltem/ contentRef/url	
<b>NOPAGES_EN</b>	Number of pages of the English document	publication/releaseltems/releaseltem [contentLanguage = 'en']/ contentRef/pages	
<b>NOPAGES_FR</b>	Number of pages of the French document	publication/releaseltems/releaseltem [contentLanguage = 'fr']/ contentRef/pages	
<b>NOPAGES_DE</b>	Number of pages of the German document	publication/releaseltems/releaseltem [contentLanguage = 'de']/ contentRef/pages	
<b>FILENAME_EN</b>	File name of the document (English version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for CENELEC	Not available	
<b>FILENAME_FR</b>	File name of the document (French version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for	Not available	

2020-11-24

	CENELEC		
<b>FILENAME_FR</b>	File name of the document (German version) available on the e-TRANS Livelink platform for CEN and on the CENELEC FTP server for CENELEC	Not available	
<b>FILENAME_OTHER</b>	Filename of the zip file (not related to a language version) uploaded on e-TRANS Livelink (e.g. Dispatch Notice when voting on ISO document...).	Not available	
<b>DIRREF</b>	Reference of the Directive(s) that is related to the work item.	project/directives/directive/reference	
<b>MANREF</b>	Reference of the Standardization Requests() that is related to the work item.	project/mandates/mandate/reference	
<b>ICS</b>	Code identifying the International Classification related to the work item	project/classifications/classification [type = 'ICS']/value	
<b>SSEC</b>	Main subsector code.	project/classifications/classification [type = 'TECHNICAL_SECTOR']/value
