

3rd Webinar for Standard Drafters - 2017-05-19

Editing and procedures at the Enquiry and formal Vote stages

Questions and answers

Questions asked by the Attendee(s)	Answers from the Presenter
The TC can decide to skip the FV by a vote. Does the TC need to meet to vote or could that be done via the collaboration tool?	The Decision to skip the Formal Vote requires a CIB with simple majority. The TC then notifies CCMC by uploading (or by email for CENELEC) the corresponding electronic transmission notice where this information is given.
Can SC do the same as TC regarding decision of results from Enquiry?	The decision must be a main TC decision, not an SC decision.
The comments are not compiled following the clause order.	This may indeed happen if one of our Member sends a wrong word file (with nested tables for example) that our collation tool does not manage to compile. We then have to add manually this file at the end of the table. An improved automatic collation of comments will be installed later on this year and this should see an improvement in the ordering of comments.
Is a TC Decision needed to send a draft for FV?	No, this can be agreed by the Secretary and Chair of the TC, no TC decision is required to submit the FV draft to CCMC.
How to access to projex on line?	Please use the link here : https://projex.cencenelec.eu To be allowed to use this link, you have to be either a Technical Body Secretary, Chairman, a Convenor or an NSB staff member. If you have problems with your existing password or need a new password please contact projex@cencenelec.eu
Does CCMC also collate the comments from enquiry?	Yes, CCMC is also responsible for compiling the comments from the Enquiry. For CEN, the Enquiry report is available 24 hours after the closure of the Enquiry onto E-Trans, for CENELEC, the Enquiry report is made available on Monday after the closure of the Enquiry via an automatic E-mail.
For adoption of a NWI, the period is 2 months or 8 weeks?	Approval of NWIs by correspondence requires a 2 months-long consultation.
