Webinar for CEN TBOs - New process for TS & TR Questions & Answers

| | | |
|----|---|---|
| 1 | For monitoring: will the system also trigger alert reports via email (e.g. at monthly intervals) | Alerts for overdue work items including TSs & TRs (stage 30.99) are sent to TB secretaries 3 months before the due date. This gives time for TCs to take relevant actions. |
| 2 | Can the tolerance requested be for any period of time, or is it a 9-month period? | Tolerances can be requested once for a 9-month (39 weeks) period only. |
| 3 | I registered yesterday a TR on Projex area, if I well understand it is not concerned by this enlarge period of drafting. But could I change the planning later? | Indeed. You cannot plan stage 30.99 anymore since this stage has already been registered in the database (i.e., before 2024-03-01). However, you can use the one change option once to modify the target date for stage 30.99. And in addition, you can also request a 9-month tolerance. |
| 4 | Is it possible to have a normative national annex to a TS (same as for an EN)? | No. There is no implementation obligation for TSs. |
| 5 | Will there be another alert between the "12-week-to-30.99" alert and the target date? | Yes, alerts are sent monthly until the due date (or where relevant exceeded the applicable tolerance) for stage 30.99. |
| 6 | Can prEN's be used as reference in EC regulations? | Normally, the EC would not make reference to unpublished docs in legal documents. In case of reference in a standard supporting a regulation, it is possible but only under certain conditions (to be checked case-by-case). |
| 7 | How can a TR respond to a standardization request if no requirements are allowed in a TR? | TRs could be requested via SReq even though they provide only information and no requirements. For example, in some cases the development of a TR could give useful complementary information to requirements. |
| 8 | Ts can be in Sreq, but TR could? | It is rare but some SReqs do request the development of TRs. |
| 9 | Bullets 3 and 5 could be combined to read "TSs & TRs can be revised but not amended"? | The modalities for revision of TSs & TRs differ according to IR2. A TS can be replaced by a new edition (new date) of a TS. A TR can be replaced by a new edition (new date) of the TR with the same number. This is currently being discussed by BTWG14 'Rules & Processes' for an improved wording to be reflected in a new version IR2. |
| 10 | Is it possible to conduct a 2nd TCA for a TR or TS in case technical comments received | Yes, it is possible. In such case, the TB needs to take a decision and then contact his/her CCMC |

| | | |
|----|---|---|
| | require further redrafting work prior to proceeding to publication? | Sectorial PM requesting a BT decision to launch a 2 nd vote on the TS or TR. |
| 11 | Who has to decide on the second vote? TC or BT? | TC via TC decision then BT via BT vote. |
| 12 | E-mail request to data for "one-change option" & tolerance ONLY if target date for 30.99 is over? | <p>One change option should be done by the TB secretary via Projex Working Area under 'Actions requiring no TB decision.</p> <p>Tolerance requests can be by sending an email to dataservice@cencenelec.eu.</p> <p>Both should be requested before the Target Date (TD) for 30.99 has been reached (ideally when receiving the alerts or before). Once the TD is reached it is too late.</p> |
