## **OSD Comment lifecycle**

All comments entered in the OSD will **first be "national" only** (meaning internal to the stakeholder organization) and not visible to anyone outside of the Stakeholder organization.

This enables organizations to manage their comments before **submitting them as official "national"** comments.

## Stakeholder commenting – add comments in OSD

## How are comments imported? Case 1: "Proposed change" is empty

MB/ NC <sup>1</sup>	Line number (e.g. 17)	Clause/ Subclause (e.g. 3.1)	Paragraph/ Figure/ Table/ (e.g. Table 1)	Type of comment <sup>2</sup>	Comments	Proposed change
DS		<u>8.10.2</u>		Ed	Remove last (second) paragraph.	
						Imported as simple

#### will import as username of person uploading; Making it national will then change it to Member acronym

#### CLAUSE 8.10.2

#### ISO/IEC 21838-1 — Part 1: Requirements

ISO/IEC 21838-1 specifies required characteristics of a domain-neutral top-level ontology (TLO) that can be used in tandem with domain ontologies at lower levels to support data exchange, retrieval, discovery, integration and analysis. One primary focus of the standard is to set forth the requirements ontologies shall satisfy if they are to support the design and use of purpose-built suites of ontologies by providing the overarching ontology content which the ontologies in the suite will be required to share in order to promote interoperability. However, the standard is intended to serve also a variety of other goals related to the achievement of semantic interoperability, for example as concerns legacy ontologies developed using heterogeneous upper-

**CENELEC** 

## Stakeholder commenting – upload comments from file

## Who can add comments?

Rules remains the same as the Enquiry without OSD and all accesses are **automatically created** based on the Global Directory (GD)

- Stakeholder commenting module for Enquiry is available for all projects drafted in OSD
- 8 projects are expected between April and June 2024
